Welcome to Product Labels & Badges - Multi-Purpose WooCommerce Plugin

1. Getting Started

Installing Product Labels

Once you've downloaded the installation file on CodeCanyon, extract it and locate a file called themeland-woocommerce-advance-product_labels-pro.zip. You can install the plugin by using one of two installation methods:

- WordPress upload** - This is probably the simplest way for most users. Here are the steps you need to take:
 1. Login to WordPress admin
 2. Go to *admin panel > Plugins > Installed Plugins > Add New > Upload Plugin*
 3. Click on "Choose File" and select *themeland-woocommerce-advance-product_labels-pro.zip*
 4. Click on "Install Now"
- FTP upload** - If you wish to install via FTP, here are the steps you need to take:
 1. Using FTP client, login to the server where your WordPress website is hosted
 2. Using FTP client, navigate to the *wp-content/plugins/* directory under your WordPress website's root directory
 3. Using FTP client, upload the themeland-woocommerce-advance-product_labels-pro directory to plugins directory on remote server

Once installation is complete, your Product Labels plugin will be ready to use. You should now see "Themeland Labels" appear in the WooCommerce Setting Tabs.

Great - you can now start building your product labels!

2. Using Product Labels

Once you've installed Product Labels, you can start building your product labels.

Setting Up & Add the Product Labels

Let's go over the possible options:

- Enable/Disable** - Enable to display labels on the front-end. When disabled you can still add/delete labels.

- Show on the detail page** - Show the product labels also on product detail pages.

Click on "Save changes" for save changes options.

- Labels** - You can see all defined labels in the table. You can still modify/delete labels.

Add New Global Label

You can do this by following these steps:

1. To create a new Global Label, go to *admin panel > WooCommerce > Settings > iThemeland Labels*. Click on "Add Product Label"

2. After clicking, Add New Global Label Page will appear

After that, there are two meta boxes, each of which is described in detail

a. - Global Label conditions

- Condition/Condition Group** - You will be able to define different conditions for labels and a product must meet at least one of the group conditions to display the label with all the terms given.

- A group of conditions**

- Two groups of conditions**

Click on "Add 'OR' group" for add group condition.

Now that you've set up your condition, let's go over the desired label.

b. - Global Label settings

In this meta box, there are settings for creating your desired label, which we put into four sections inside four tabs.

Now let's go over the settings within each tab

GENERAL

- LABEL TYPE** - There are four types of labels (Label, Pre Define Shape, Count Down, Image)
 - Label**: You can create any type of label with a variety of styles
 - Pre Define Shape**: You can select different types of predefined shapes in the 'LABEL SHAPE' field.
 - Count Down**: You can choose "count down" as a label and with predefined styles in 'COUNT DOWN STYLE' field
 - Image**: You can choose an image as a label
- USE INTELLIGENT LABEL** - Add a text like "50%" to the text of the label, dynamically filled in with product details, and if there is no value, then the product details will not be used.
 - Percentage**: The percentage of discount of product
 - Discount**: The discount of product
 - Regular Price**: The regular price of product
 - Sale Price**: The sale price of product
 - Delete Price**: The delete price of product
