3-INSTALLATION

There are two methods to install the theme.

a : Installing from WordPress

b : Installing Via FTP Server

If the normal installation method (a) is not supported by your web host, you will have to use the alternate option (b).

Installing from WordPress

Login to WordPress Admin and browse to **Plugins > Add New** and click **Upload Plugin** and in new page Click on **Chosen File** Browse your computer to select " ithemeland-woocommerce-bulk-coupons-editing.zip" (it's in the zip file you downloaded from Codecanyon). Click **"Install Now"** button.

Wait while the plugin is uploaded and installed.

Once it's uploaded, click the **Activate Plugin** link.

Installing via FTP Server

Follow the steps below to install via FTP:

Log into your hosting space via an FTP software.

Unzip the " ithemeland-woocommerce-bulk-coupons-editing.zip" file and ONLY use the extracted plugin folder.

Upload the extracted plugin folder into wp-content/plugins folder.

Activate the newly installed plugin. Go to Plugins > Installed Plugins and find " **iThemeland WooCommerce Bulk Coupons Editing**" plugin and active it.
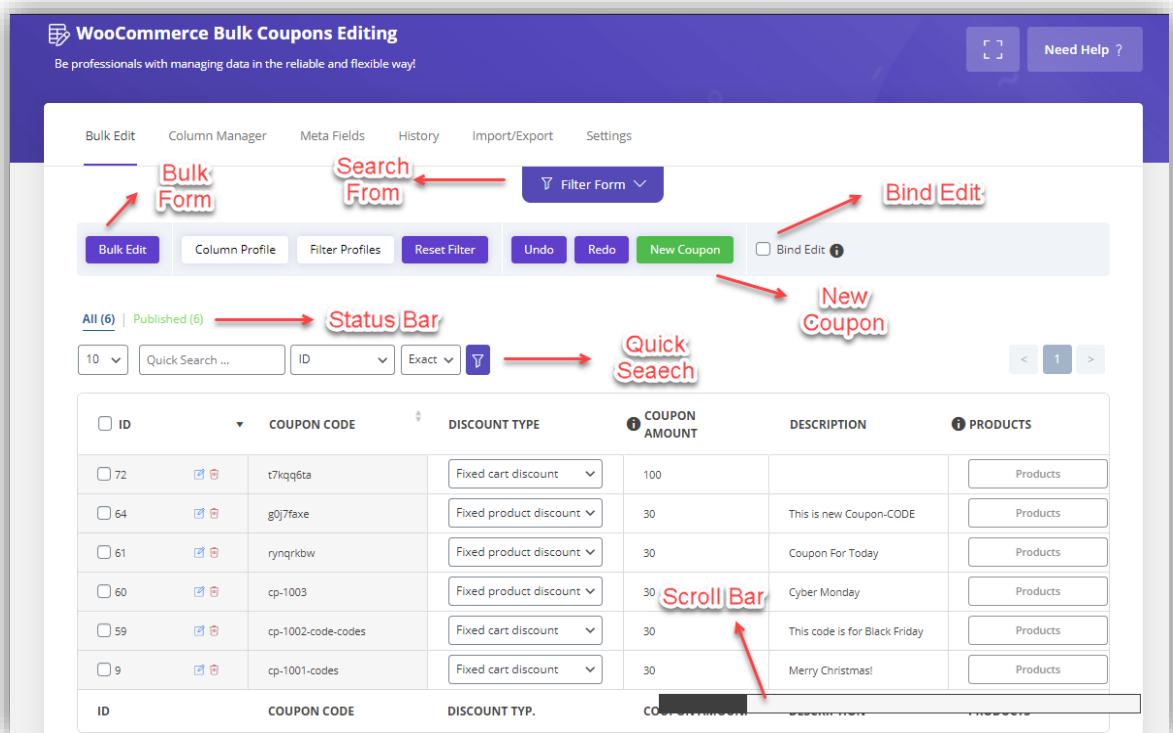

Note: You should install "**iThemeland bulk bundle core**" as requirement plugin.

4-How to Use?

After Install and Activate this plugin a menu will be added in your admin menu named "Pro Bulk Bundle" and click "Woo Coupons"

Coupons Editing:

This plugin included several sections.

- Filtering
- Bulk Editing
- Column Manager

- Add Meta Fields

- History

- Import/Export

- Settings

- Toolbar

- Coupon Table

• Filtering:

There is a search form included all WooCoommerce Coupons field that divided in 4 separate tabs based on fields type with specific operand (Behavior).

It is possible to filter coupons of your site and see result in table.

1- **General:** Popular WooCommerce Coupons fields. Such as ID, Date and ⋯

Most of these fields are as Text type beside of behavior drop-down.

Like: will be found Coupons where text input value is exact or like a part of the text (title for example).

Exact: will be found coupons where text input value is exact as in the text(title for example).

Not: will be found coupons where text input value is not presented.

Begin: will be found coupons where text input value is on the text(title for example) begin.

End: will be found coupons where text input value is on the text(title for example) begin.

Note: For searching by coupons ID always uses 'EXACT' only. Also for searching for some coupons by ID you can use comma for example: 23,586,777. Also it is possible use ranges like: 29-32 - will be found coupons from ID 29 to ID 32. You can search in only parent coupons too.
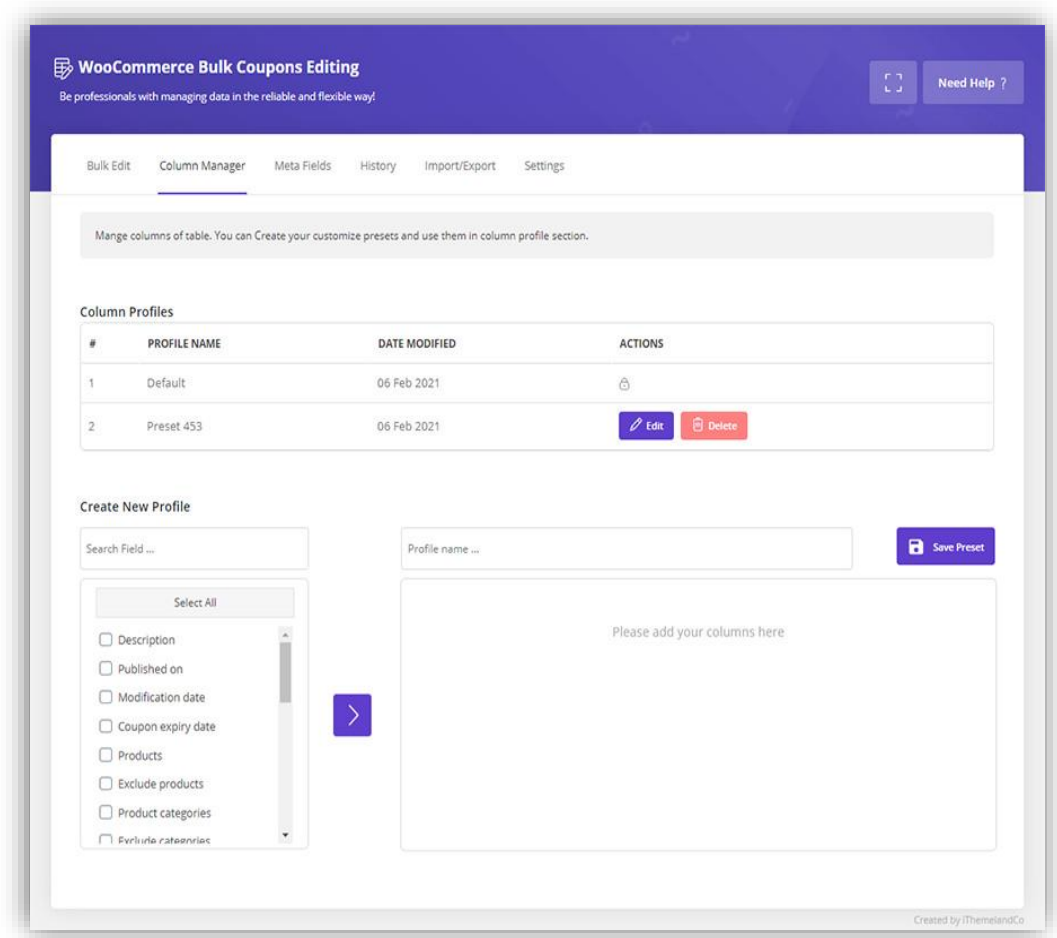

2- **User Restriction:** In this tab you can search coupons by Minimum and Maximum spend and the target items(products and categories) too.

3- **Usage Limits:** There are another fields that you can use them for filter of coupons.

4- **Custom Fields:** If you add Meta Fields in "Meta Fields" sections will be appeared in this tab and you can search over them.

Note: There is an option to save your search form as profile and use it for next times.

• Column Manager

Mange columns of table. You can Create yours customize presets and use them in column profile section.

There are some default presets that you cannot Edit/Delete theme.

Although you can add new profile too, for that you should follow below steps:

1- Set your profile's title.

2- Select columns in left side add move them to right side.

3- You can set label and Background Color and Text Color

4- You can move column to coupon them too.

When you save presets, you can Edit/Delete them too. Your presets will be appeared in column profile (will be explained in future).

- ## **Meta Fields**

In this tab you can attach all coupons meta fields related to the coupons in 2 ways:

1- Manually: add keys by hands, do it when you know meta key

2- Automatically from coupons: convenient way gets all meta keys and leave all you need. Just drop in the text input the coupon ID which has already filled up all meta data you need and press 'Plus' button or Enter on your keyboard.
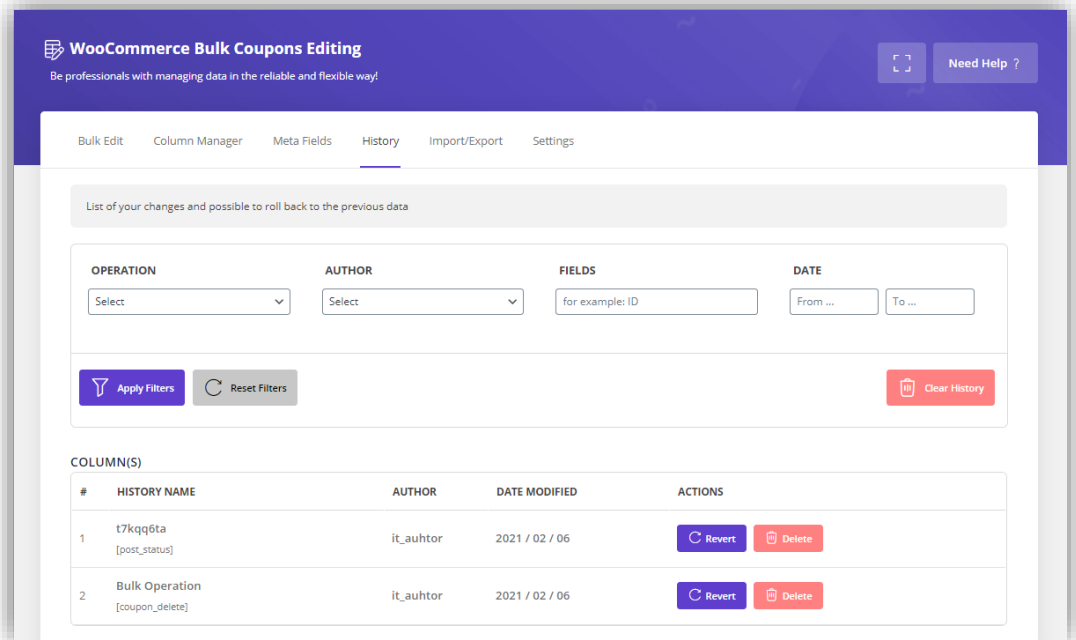

After adding meta key in the system select which type data keeps there and how to display it in the Coupons Editor. For decimals select type 'number' and string for all another types. If data is logic and can be 1 or 0 - select view type as checkbox.

Do not forget to rename meta fields title, because usually it has long title (equal to key string) and without changing this title its column in the Coupons Editor will be to wide.

After adding meta keys, renaming and selecting its view type click on 'Save fields' button. The new fields will be added to Search Form in Custom fields tab, Bulk Edit in Custom Fields tab, Column Manager and Column Profile.
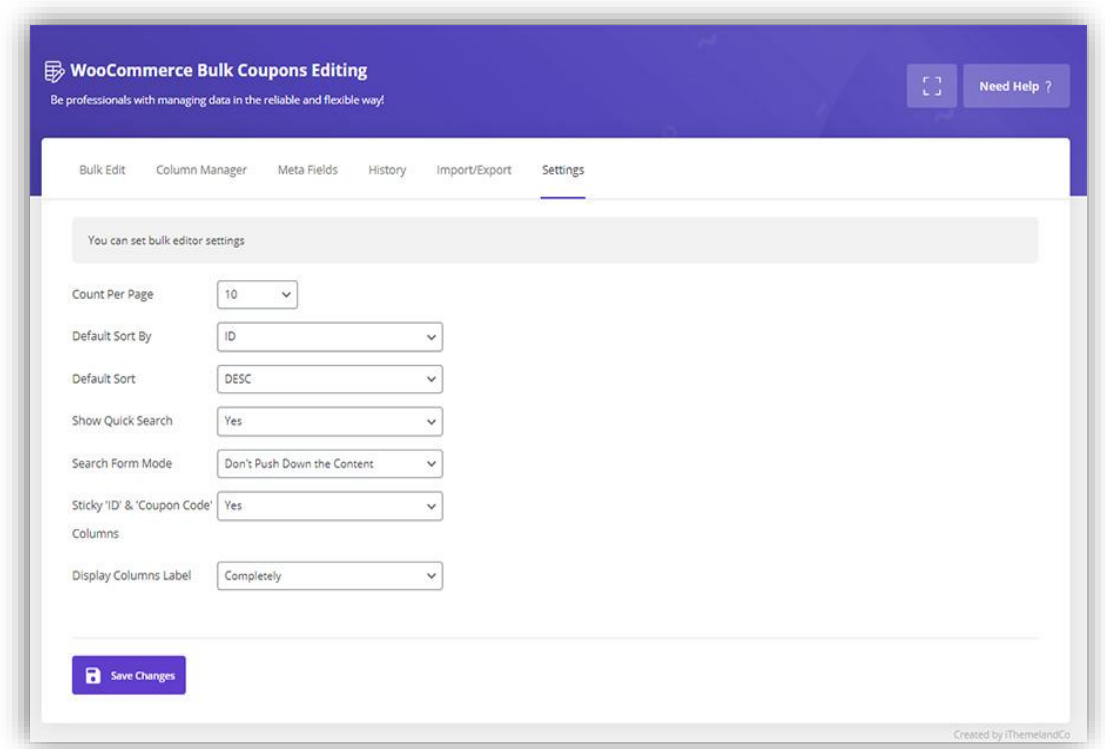

• History

List of your changes and possible to roll back to the previous data. Sometimes mistakes happens, and it is not appropriate for the shop data. To roll back to the previous data will help tab History, where it is possible to roll back nearly all the coupons data as for one coupon so for bulk operations.

Some buttons in this tab you interested in:

- **Clear the History:** remove the history for the current logged-in user. Do it before starting of your work day to avoid big heap of history data where you can get lost.

- **Revert:** button which displays on each history operation. Clicking this button revert data to the coupon field ID and title of which you can see on the left side
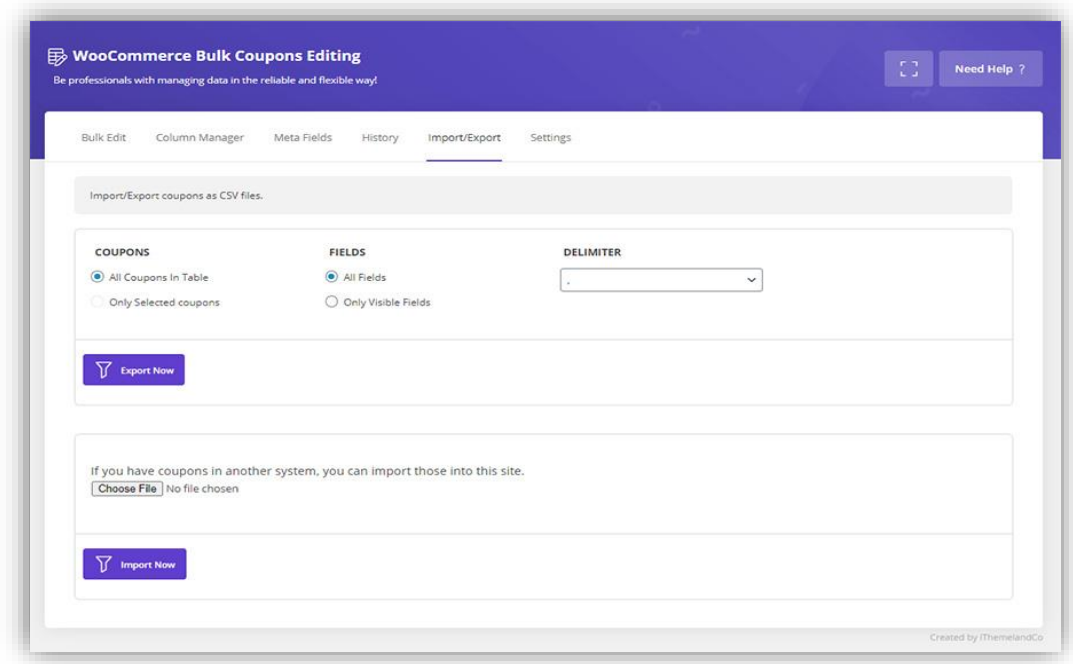

- **Delete**: remove a history item forever

• Settings

There are some settings:

- **Count per Page:** Number of rows in each page of table
- **Default Sort by:** Sort data Base on which one of fields?
- **Default Sort:** Ascending/Descending?
- **Show Quick Search:** Show/Hide quick search in top of table.
- **Search Form Mode:** Push down the content after search form be opened or Don't push the content.
- **Sticky ID & Coupon code:** Fixed ID and Coupon Code columns after scroll too.
- **Display Columns Label:** There is two options for column label, display completely or display as short text.
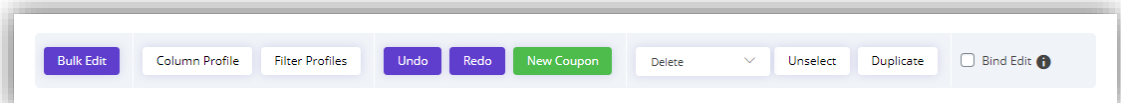

- # Import/Export

In this tab you can Import coupons through Import button or Export Coupons.
There are some options for Exports.

- All Coupons in Table: Export all of coupons that's appeared in table.
- Only Selected Coupons: Export selected coupons in table.
- All Fields: Export coupons with all WooCommerce Coupons fields.
- Only Visible Fields: Export coupons just with visible column in table.

• Toolbar Actions

• Bulk Editing:

Now you need to edit data in your shop. You can do that in 3 ways. Do bulk edit on:

- All Coupons
- Filtered Coupons
- Selected Coupons (Checked by checkbox)

Here is more information about Bulk Edit Form, Tab 'Bulk Edit' divided on 4 parts:

1- **General:** Popular WooCommerce Coupons fields. Such as ID, Date ...

2- **User Restriction:** Edit all of user restriction information. There are two types of fields. Some of them are numeric and some of them are Multiple chosen.

There is Behavior Drop-Down for each numeric fields such as:

> **New:** Set as new value
>
> **Clear Value:** Set empty value
>
> **Formula:** In this case you can use formula. First of all, consider the current value is X. (X+10) / 2: this mean the current value should be Plus 10 and divide by 2
>
> **Increase by value:** increase value based on fix value
>
> **Decrease by value:** decrease value based on fix value
>
> **Increase by %:** increase value based on percent value
>
> **Decrease by %:** decrease value based on percent value

There is Behavior Drop-Down for each numeric fields such as:

> **Append:** value will be attached to the end of the existed

value

> **Replace:** existed value will be removed and replaced by new value

> **Delete:** Remove entered value in the existing value and
> remove it

3- **Usage Limits:** There are some numeric value with the same drop-down is mentioned before.

4- **Custom Fields:** If you add Meta Fields in "Meta Fields" sections will be appeared in this tab and you can change them in selected coupons.
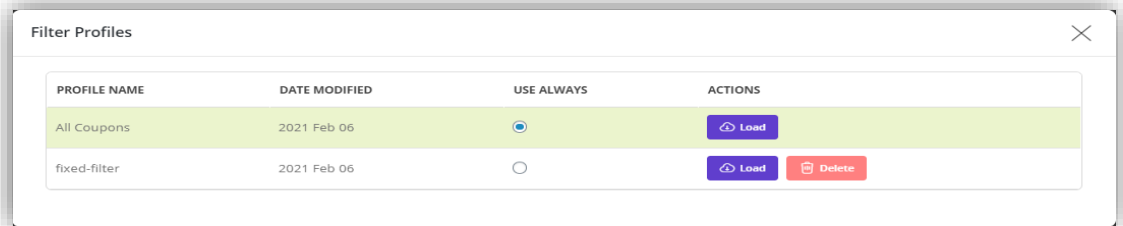

- # Column Profile

Sometime you need to change the column coupon, show/hide some of columns. You can switch between saved profiles.

There are 3 default profiles for that beside of your profiles that you can make by Column Manager section.

Note: If you change the checkbox, you can save it as new preset or save over selected profile (Not for default profiles).

- # Filter Profile

There was an option is search form that you can save your search query and use it for next time. Here you can load previously saved filters profile.

You can load your profile for this moment or set it for default query (Use Always), this mean after reloading page, your search will be applied automatically.

• Undo/Redo

Sometime you undo/redo your changes.

• New Coupon

You can Add New Coupon(s).

• Duplicate

Create clone coupons for selected coupons.

• Delete

Delete selected coupon in 2 ways: 1- Move to Trash 2- Delete permanently

• Bind Bulk

This option is usable in Edit Inline, if you enable this option, you can apply the current changes to all of selected coupons.

For example, you select 3 coupons and change the title, 3 selected coupons get the same titles.

- ## Edit Inline

In edit table you can click on each cells and edit the values based on their type. For example, Calculator for numeric fields and ….

5-License:

You should set your purchase key and verification. After verification you can use plugin perfectly.
