4- Overview

WooCommerce Dynamic Prices By User Role plugin facilitates Administrator to offer different prices for all different roles. The role can be Administrator, Editor, Author, Contributor, Subscriber, Customer, Shop Manager, Guest and your created role.

The plugin allows you to update dynamically product price, according to the role of the user who is going to purchase. You can either set price globally for different role , which applies globally to groups of products in your store, or it can be specifically created for a single product in the shop.
The plugin provides an option of the discount or markup while adjusting the prices for any user role. The plugin enables you to adjustment the prices for individual products as well as all the products for the required role(s).This way you will be able to increase or decrease regular product price easily by creating different prices for the same product.
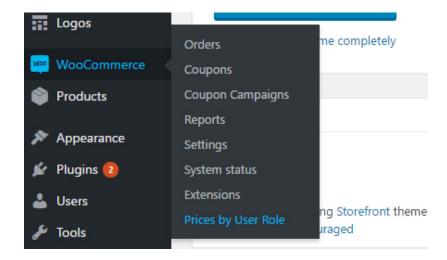

Also you can hide "add to cart" and "price" for different roles generally for all products or specially for a single product and also set a custom text instead them.
Note: These options are active for unregistered users too.
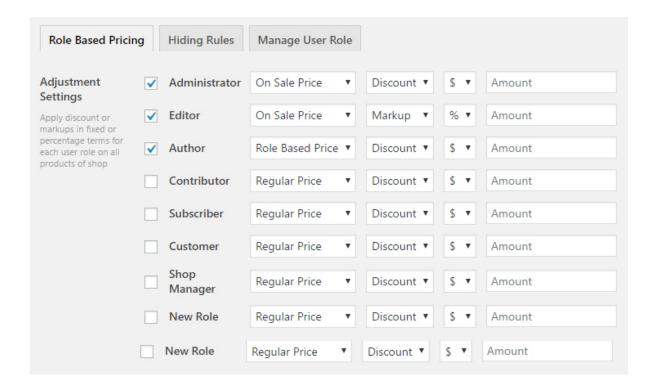

Also you can add a suffix text to all product prices for each user role separately or generally for all users.

5-How To Use

For view plugin navigate to Dashboard > WooCommerce > Prices by User Role.

5-1- Adjustment Settings

In this section you can choose adjust the prices to each user role.

User role: choose the role that you want to apply discount or markup on it.

Apply price on : "discount" or "markup" will be applied to the "Regular price" or "sale price" or "role price" (the price that set for each role on product single page)
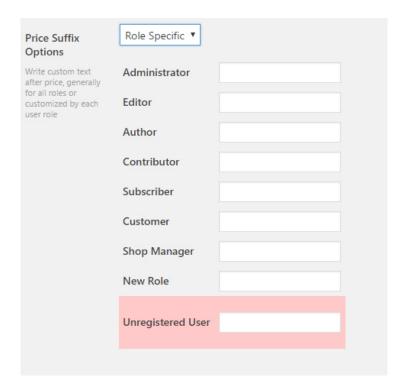

Adjust type: you can choose between "discount" or "markup"

- Discount: If you want to give the discount on product prices, select this option.
- Markup: If you want to increase the original product prices by the specific amount, select this option.

Type: You can mention the amount in % or $.

Amount: The amount to discount/markup . Enter a number, like '25'.
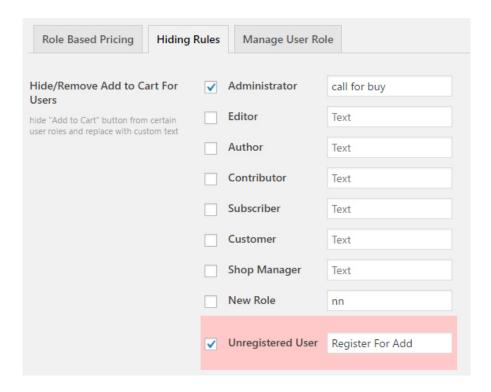

5-2- Price Suffix Options

With this section, you can add customized text suffix to the price for all the user / unregistered user / specific user role.

apply Suffix on: The options are as given below:
- **None:** if select this option, any suffix don't add to the price of the product.
- **General:** You can add the suffix to the price of products and this suffix is visible to all the user irrespective of the user role as well as the unregistered user. Enter the Suffix Text which is added after the price.
- **Role Specific:** You can add the suffix to the price of product according to the specific user role

Click **Save changes** to save/update the settings.

# 5-3- **Hide Add to Cart Based User Roles**

With this option you can hide "add to cart" button for each user role and set a custom text instead it.

For this go to plugin "Hiding Roles" tab and on "Hide/Remove Add to Cart For Users" check considered users for remove add to cart. If you want users view custom text instead it, fill text field of each role otherwise nothing show instead add to cart button.

Note: You can set these options for unregistered users too.
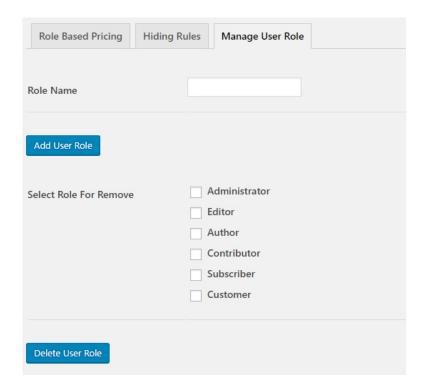

5-4- Hide Price Based User Roles

With this option you can hide price for each user role and set a custom text instead it.

For this go to plugin "Hiding Roles" tab and on "Hide/Remove Price For Users" check considered users for remove price. If you want users view custom text instead it, fill text field of each role otherwise nothing show instead price.

Note: You can set these options for unregistered users too.

5-5- Manage User Role

You can define unlimited role with our plugin.
For this option go to plugin "User Manage Role".

5-5-1- Add User Role

For add new role enter role name on this section and click Add User Role. The user role gets created if it does not exist.
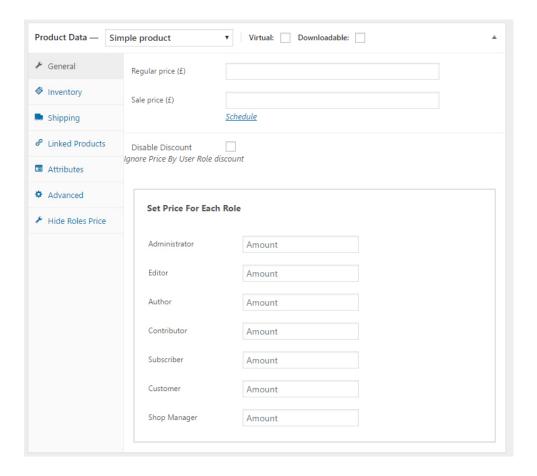

5-5-2- Remove User Role

To remove user role Select the checkbox for the user role(s) which you want to delete and Click "Delete User Role" button.
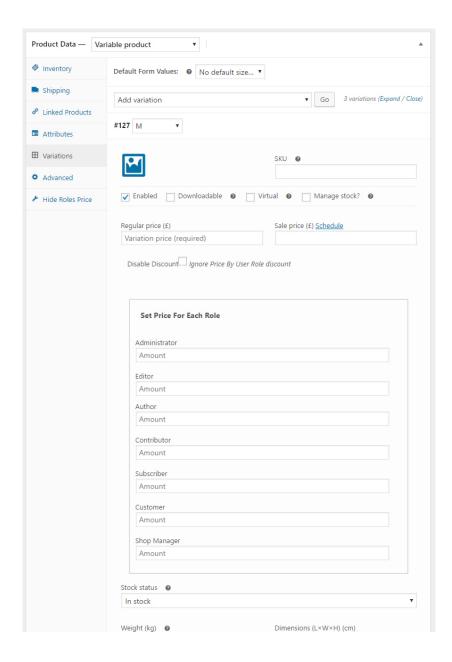

6-Single Product Setting:

6-1- Set custom price for each role

You can set different price for different roles on single product page. For this, on edit product page, on "General" tab, you can set custom price for each user role.
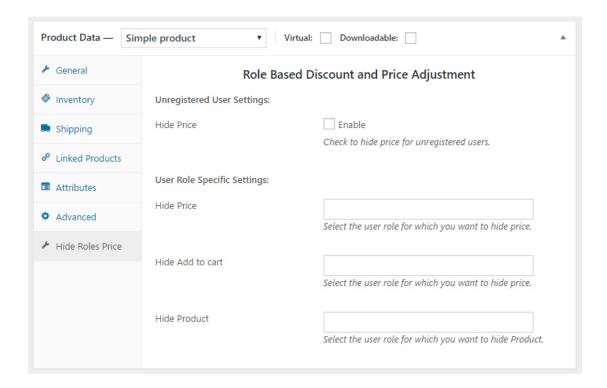

Also you can set different price for each role on variable product on "variation" tab.

Also you can disable discount / markup for single product on "General" tab and "variation" tab.

6-2- Single Product hiding rules:

We provide a custom tab named "hide roles price" on edit product page that contains:

- **Unregistered users settings**:
  - o **hide price:** hiding price of individual product for unregistered users
- **User role specific settings:**
  - o **Hide price:** Hiding price of individual product for specific user roles
  - o **Hide add to cart:** Hiding add to cart of individual product for specific user roles
  - o **Hide product:** Hiding individual product for specific user roles
